GENERAL INFORMATION

Full-featured Eos software is available for installation on Windows and Mac computers. The software is free to download, and can be used to create or edit show files for any Eos Family controller. When an ETCnomad key is connected to the computer via USB, the Eos software can directly control conventional and LED luminaires, moving lights, and media servers.

The ETCnomad key also allows the computer to act as a backup for Eos Family controllers, or to join larger systems as a client. Without the ETCnomad key, the computer can mirror the connected device. Optional fader wings, programming wings, and OSC programmable devices allow extended and customizable control.

Eos Family software includes:

- Approachable yet powerful syntax for programmers of every level
- Industry-leading color control tools
- Magic Sheets for custom programming and displays
- Augment3d 3D programming and visualization environment
- Virtual Media Server function for pixel-mapping
- Timecode and automation integration
- Multi-user and multi-programmer working environment

For drawings, photos, and more, visit the ETCnomad product webpage. To explore the latest software features, accessories, and other Eos Family products, visit etconnect.com/Eos.
